THE GERRIT SMITH DONEES.

Editors of the New York Tribune.

In one or two articles on the subject of Donations of Land by Gerrit Smith, you say that such donations were on candition that the donees should settle upon the land. This I think is a mistake. Having been one of the persons appointed to select the beneficiaries in an adjoining County, I received one of his printed circulars, in which the requisites for beneficiaries are named. These requisites were: That they should be "white inhabitants of the State of New York, between the ages of 21 and 60; virtuous, landless and poor, and entirely clear of the vice of drinking intoxicating liquors." To be taken from the sexes in equal numbers. The white beneficiaries in the State were one thousand, distributed among the Counties according to their population.

Mr. Smith did not, therefore, require that those who received the lands should promise to sottle on them. And he also finally determined not to give land to the 500 females, but to give each of them instead \$50 in money, with the recommendation

instead \$50 in money, with the recommendation that they should invest it is land, but not requiring it. He thus gave to the 500 females, in cash, \$25,000, besides the \$5,000 (in \$10 sums) to the males. Respectfully, Anthony Lane.

Never, perhaps, in the history of the order has their been so general an attendance of delegates at any previous session of this body, or one when the delegates manifested a deeper devotion to the great principles of human progress and Labor Reform, or on which a more determined and united spirit has prevailed, to push the great cause forward to ultimate success. The officers of the present Convention are J. P. Marphy of No. 1, Lockport, S. P.; John J. Nix, 49 Elmira, D. S. P.; Farington Price, 11, of N.Y. City, S. S.; Peter Patman, 22, Albany, S. T.; E. SERVING A REPLEVIN .- The Jefferson Market Police Court was, on Monday afternoon, the scene of a rich and novel performance. It appears that since the arrest of James T. Boyd and the woman Livingston, alias Starr, on a charge of obtaining a large amount of property by fraud, from Mr. Ira Topping, Justice Bleakely has had in his possession a trunk claimed by Boyd, which is supposed to contain deeds, mortgages and other papers material to the issue of the case. Boyd, since the seizure of the trunk, has seemed particularly desirous of regaining possession of it, and for that purpose, on Monday his counsel sued out a writ of replevin, which he placed in the hands of Deputy Sheriff Mariner, who, with him, at once procee to the Court room and peremptorily demanded the trunk. This demand the Magistrate promptly refused to comply with, whereupon the learned counsel ordered the Sheriff to arrest the sitting Magis trate. Justice Bleakely, not being at all alarmed, requested them, if they thought proper, to proceed, but the Deputy Sheriff did not immediately com ply, and the Justice, as an offset to the impertment and bombastic manner displayed, ordered the attendance of Assistant Captain Lovet of the Ninth Ward Police, with a posse of men, at the Court room. The aspect of affairs now became threaten. ing, and a tragedy was about, to all appearance, to be performed. But fortunately for the peace, the distinguished counsel, with his small besieging army, thinking discretion to be the better part of valor, made a hasty retreat, leaving the Magistrate still master of the ground. Information was then dispatched to the approaching forces that the enemy had fled, the battle had been won, and that too without the loss of a drop of blood.

MEDICINES PHILAMTHROPIO DISCOVERT.

DEPOT AT THE CARLTON HOUSE, So Leonardest.

Corner of Broadway, where can be procured the memoir that I published in June just entitled. The Science of

DEPOT AT THE CARLTON HOUSE, so Lecourdes. More that I published in June is an inited "The Science of Medicine reduced to its simplest form," containing the important pithinturopic discovery of M. Loois Deckmaps, by means of which every one can be nis own physician and apothecary; diffusion of the knowledge of the properties of a piant which will be of essential service to homashy; on the danger arising from the use of fire arms, resulting from the precusion generally used to prevent accidents. In order to comprise my philanturopic enterprises, I have enjoyed all the means which my imagination has suggested to enable the properties of the prescription, which it consists, and to make the ecclesive to enable every one to receive sincet graits the recipe and the prescription, which it consists, and to make the necessary application at once without the sid of any intermediary. I believe that by addressing myself to the Government, all select and intelligent persons, it was taking the entities of the Executive Department of the General Government, all select and intelligent persons, it was taking the set mones to popularize my discovery through the medians of the public prints. I have dispatched a copy of my memorit to every editor whose address i could obtain. I have engineered nothing to facilitate the universal knowledge of my discovery. I have used every precaution to render the preparation of my paraneae say to be understood, or this avery one interested in the subject might make it without difficult. Two of this root near the many individuals were destrous of making my paraneae acts to be understood, or this avery one interested in the subject might make it without difficult to be readily followed.

Two of the proofs aread are very rare in fixer or one making my paraneae and are very rarea in fixer or one, it has a full to covery of the several or of the means and the artistiochtin of make inquire of the symp. It is then only measured to within there are two variations, the bing and the Artistiochtin of make in

The quantities of the roots above referred to, which I possess being very inside, I would urge on private individuals, and especially on the commercial community, to make finging for them, and also to order from the Levanice the Exalindies a supply of the seed vessels of Senna, which are not found here, and are not very shundant even in Europe.

Those who do not wish to take the trouble to prepare my remedy, can find it put up in bottles at my desot. The urgent request of many of the clitzens of New York and the deficiency of the necessary materials are the reasons that induce me to anticipate the period, which I had fixed on for establishing a depot, which I did nized on for establishing a depot, which I did not until start this of my remedy in some part (so matter where) of the United States. I cannot forbest urging on the public the expediency of this total at an early day. Society is interested in the question, aspecially with reference to the progress of the Chotera. I am ready to guarantes with all had I possess the most happy results I beg the officiral corps to assign to my philanthropic article the most happy and the position in their journals which it may be in their power to give.
